MAY DAY MEETING AND CELEBRATION 2005

The world is in a downward spiral of confusion, ideological uncertainty and reaction.

US imperialist war threatens the planet with bloodshed and aggression.

Religious bigotry – whether Christian fascism or medieval fundamentalism – attempts to reassert itself in the 21st century. British universities close their science departments as the gains of the Enlightenment retreat and the world looks backwards.

British industry closes and ships abroad in Chinese-owned fleets.

British agriculture and fisheries are ransacked by European Union diktat.

Democracy is parodied by the re-election of Bush in the USA. The EU globally creates and endorses bigots and religious flat-earthers.

In Britain, the oldest capitalist ruling class wallows in the corruption of parliament, while desperate to hand over power to the unelected in Brussels. There is a huddling together of nearly every ruling class of Europe in the European Union – a collection of born-again Thatcherites.

Blair offers a Third Term of more privatisation, re-packaged Thatcherism, more EU integration, casinos, 24-hour drinking and a cocaine epidemic.

The working class is the true superpower. We are the one force for progress in the world today. If even a handful of peers can hold Blair up, imagine what the working class could do, if it decides to.

We have to say NO to Blair.

No to connivance in Imperialist War. And **No** to superstition in any language, shape or form.

YES to independence, to self-reliance, to rebuilding of industry and agriculture, to skill, science and education.

Say YES to a Workers' Britain.
